

STONY PLAIN SUN.

VOLUME ELEVEN.

STONY PLAIN, ALBERTA, THURSDAY, MAR. 5 1931

Whole Number 592.

A History of the Local School.

A cool wind from the north blew down the main street of Stony Plain on that memorable spring day, April 2, 1907.

Snow lay in heaps on country roads, a testimony to the severity of the previous winter which had been one of the worst on record.

Stony Plain village was in the making, just arising out of the muskeg, and the plight of the growing generation engaged the attention of the village fathers. Education must not be forgotten even in the excitement of boom days and rowdy pole peelers.

In a building then being erected and which later became Puler's drug store, a number gathered in the first ratepayers meeting. Such names as Brown, Hy Willie, O. Glanum, F. Malm, J. Forster, J. Ingle, Geo. Imerson, Jess Graham, H. Cann could be heard on that occasion—names which now repeated lead us to thoughtful reminiscences. Others also were present, for we find that after a unanimous vote in favor of organization, the first trustees board was elected, consisting of J. Umbeck, Sec. Treas, P. B. Miller, Hy Willie. The first board meeting was held that evening in Miller's store. It was at first thought to erect a 40 x 40 structure, at a cost of \$9000; later, these estimates were

Prin Kreider's Rival.

This town was honored on Sunday last by the presence of Wm. Carter, traveling musician. He entertained patrons of local restaurants to a number of selections on his violin, which he claims is 200 years old, or thereabouts. The instrument has an interesting history, according to the teller, having survived numerous adventures by fire, flood and aeroplane. "Bill" claims he has performed "in every big town on his 8000 mile trip from Wales, O.B." and is now heading for Vancouver and Shanghai. He offered to stay here and bring the defunct town back to life.

Oh, yes; "Bill" can also imitate the bagpipes on the tin flute he packs around; and asks you to listen in on your radio tonight, as he expects to be broadcasting from Edinburgh.

Last Call for New Plates.

Time's up! Better change the license plates on your car, guys, because this is the official warning (free of charge) that the Police have been instructed to take action against drivers who are wearing 1930 green instead of the new, true blue of the 1931 license plates on the fronts and backs of their cars. Green is simply not being worn any more this season, so far as far as cars are concerned, and the old green plates are likely to draw the bothersome attention of the Police.

pruned down to the sum of \$4000 deducted for a school 30x48, to be erected on college heights, six lots having been purchased for \$345. C. Glanum was given the building contract for \$3000. A tax rate of 10 mills was levied. On Jan. 1 1908, Miss Lee, as first teacher at a salary of \$825 per year, began unfolding the scroll of human knowledge. Jess Graham and Hy Baptman were the janitors. Development came west as rapidly. Main St. rising with oblong grassy slopes in the Muskeg shape and ending beyond, swarmed with freighters, telephone poles, C.N.R. officials and railroaders, with a spiny sprinkling of homes, beavers and muskrats, among whom Spt. McBrayne moved with quiet confidence and control of the R.N.W.M.P.

At this stage two men appeared on the scene, destined to influence public affairs. Mr. Linden, an itinerant lawyer, slightly deaf but never dumb, saw the gleam of a radiant future for the village. Burning with civic fervor, he walked the streets until he had counted 801 residents who were more or less responsible in village business; and Stony Plain greeted the new year of 1909 arrayed in the vestments of an incorporated town.

To be concluded Next Week.

Thrift --- Waste

At the present time people in all walks of life, individuals, corporations, governments, are deeply concerned over the prevailing business depression, unemployment, loss of purchasing power, accumulation of debts. Everywhere people are seeking to learn the primary cause with a view to applying a cure; they are anxious not only to overcome existing conditions, but to ascertain the cause with a view to preventing a recurrence of such conditions.

Some talk heartily of the world's supply and distribution of goods, which is the basic standard of all international business. Others complain of over-production, although the more generally accepted view now is that the world suffers not so much from over-production as under-consumption. Numerous war debts imposing heavy taxation on all, are held by some to be the underlying cause. Restrictive tariffs, shutting off nations and interfering with the free flow of trade, are blamed by others. Faulty and unduly expensive methods of distribution from primary producer and manufacturer to the ultimate consumer are responsible, so others contend.

But when all these, and a multitude of other things are considered and given their due weight, does not the basic cause lie much nearer home for the average individual? Is it not because of a lack of thrift, the indulgence in habits of waste, that many persons find themselves in financial difficulties?

The writer can well imagine the reader saying to himself that the present is not the time to talk about thrift, when people have little or nothing to save and cannot indulge in waste because they have nothing to waste. But, the writer contends, this is, therefore, the most opportune of all times to advocate thrift and condemn waste. It would be a mistake to remain silent until times are booming again, because people then are in no need to listen. It is when a dollar looms up big, big as ten dollars when times are good and business brisk, that people are more willing to give heed to the benefits of thrift. When money comes easily, it usually goes just as easily, but when it is hard to get we are the more inclined to hold on to it.

In his autobiography, the late Edward Bok, the famous editor of "The Ladies' Home Journal," tells how, when he came to America as a lad of six from his native land (the Netherlands), the most wonderful lesson for him was the necessity of thrift. He had already been taught that thrift was one of the fundamentals in a successful life; his family had come from a land noted for its thrift; but, he says, "we had been in the United States only a few days before the realization came home strongly to my father and mother that they had brought their children to a land of waste." Where, says Mr. Bok, the Dutchman saved, the American wasted. There was waste, and the most prodigious waste, on every hand. It was, he says, an easy calculation that what was thrown away in a week's time from Brooklyn homes would feed the poor of the Netherlands.

Continuing, Mr. Bok says: "At school, I quickly learned that to 'have money' was to be 'wily'; as a young man, I soon found that the American disliked the word 'economy,' and on every hand as plenty grew spending grew. There was literally nothing in American life to teach me thrift or economy; everything to teach me to spend and to waste. I saw men who had earned good salaries in their prime, reach the years of incapacity as dependents. I saw families on every hand either living quite up to their means or beyond them; rarely within them. The more a man earned, the more he—or his wife—spent. I saw fathers and mothers and their children dressed beyond their incomes. The proportion of families who ran into debt was far greater than those who saved. When a panic came, the families 'piled in,' when the panic was over, they 'let out.' But the end of one year found them precisely where they were at the close of the previous year, unless they were deeper in debt."

Is it not true,—we ask the question advisedly,—that many of us are in financial difficulty today because, instead of exercising thrift when times were good, and putting aside a little against the day when times might not be good, we spent to the limit of our earnings, possibly beyond, in the belief that times would always be good, and now we are in trouble with no reserve to fall back upon? Is it not true that we were wasteful, perhaps not in big things, but in numerous little ways, carelessly expending a dollar here and a dollar there which, if saved, would be a veritable godsend now? In these days of world depression, France has been quoted over and over again as the nation least affected and with less unemployment than any other great nation. Why? Because the French people are notoriously frugal; they save their pennies; they waste little.

But we in this new world, with far greater material wealth and wider opportunity, are wasteful, extravagant, spendthrift. And the result, when depression comes and with no reserves, we suffer, is not, perhaps, the real, the underlying cause of much of our present difficulty to be found in this unfortunate trait in our people? Think it over, each for himself or herself.

Too much ACID

Many people, too busy after eating, suffer indigestion as they call it. It is usually excess acid. Correct it with an alkali. The best way, the quick, harmless and efficient way, is Philip's Milk of Magnesia. It has remained for 50 years the standard with physicians. One spoonful in water neutralizes many times its volume in stomach acid, and at once. The symptoms, such as heartburn, gas, heartburn, etc., will disappear in five minutes.

You will never see crude methods when you know this better method. And you will never suffer from excess acid when you prove out this easy relief. Please do that—for your own sake—now.

Be sure to get the genuine, prescribed by doctors for conditions due to stomach acid. It is always a liquid; it cannot be made in tablet form. Look for the name Philip's and the word genuine in red.

(Made in Canada)

Taking the Census

Army Of 15,000 To Be Deployed In Huge Undertaking

Three times as many persons will be needed to complete Canada's decennial census this summer as Wolfe had when he stormed the Quebec citadel to annex the country to the British Empire, states F. H. Coats, Dominion statistician. On June 1 next a veritable army of 15,000 men and women will begin enumerating the population of the country, gathering accurate and reliable information and social and economic records.

It will be the seventh census since Confederation and will be unique in that unemployment figures will be gathered and information regarding hospitals, asylums and child welfare institutions.

An head of the enumeration and compilation staff, Mr. Coats sought the co-operation of all Canadians, asking that they furnish accurate information when interrogated and expedite proceedings as much as possible.

Acids In Stomach Cause Indigestion

Medical authorities state that nearly nine-tenths of the cases of stomach trouble, indigestion, nervousness, burning, gas, bloating, nausea, etc., are due to an excess of hydrochloric acid in the stomach. The delicate stomach lining is irritated, digestion is delayed and food sour, causing the disagreeable symptoms which every stomach sufferer knows so well.

Artificial digestants are not needed in such cases and may do real harm. Try taking some all digestive aids and instead get from any druggist some Eucated. Magnesia and take it water right after eating. This weakens the stomach, prevents the formation of excess acid and there is no stomach gas or pain. Eucated Magnesia (in powder or tablet form—never liquid or milk) is harmless to the stomach, inexpensive to take and is the most efficient form of magnesia for stomach purposes. It is used by thousands of people who enjoy their meals with no more fear of indigestion.

Vagner Festival

Toscanini Will Conduct Performances Of Tannhauser At Bayreuth

Toscanini, Partswengler and Elmendorf will be conductors at this year's Wagner Festival to be held at Bayreuth. This will be the second year in succession that this honour has been to Toscanini.

Born in Parma, Italy, in 1867, Arturo Toscanini has had a brilliant musical career. He received his early training at Milan Conservatory and in the year 1898 was appointed to the conductorship of the Metropolitan Opera House in New York, which position he retained until 1901.

To the thousands who attended the festival last year his conducting was a revelation and completely vindicated the faith of those responsible for the breaking of the tradition that only a German was capable of interpreting Wagner.

Boris Hainbourg, of that famous Canadian quartette known as the Hart House Quartette, all of whom attended the festival, described the conducting of Toscanini as being nothing short of marvellous. In all his interviews on his arrival at Montreal on the Canadian River "Assault" after the festival, Hainbourg had nothing but the highest praise for the Italian conductor.

Arturo Toscanini will, this year, conduct all performances of Tannhauser on July 21st and August 1st, 8th, 9th and 17th. He will also conduct "Parsifal" on July 22nd and August 6th, 9th and 16th. It was originally intended that Dr. Meak would conduct "Parsifal," but owing to a very serious illness he has been compelled to withdraw. Dr. Meak is a musician who has been brought up in an atmosphere literally steeped in the Wagner tradition, and it was with great regret that he has had to discontinue his Bayreuth activities.

This year Herr Partswengler will be musical director-general of the Bayreuth Festival Plays, and will conduct "Tristan" himself. Carl Elmendorf will again be the conductor of the "Ring of the Nibelung."

Convenient sailings can be arranged via the Canada Line for those wishing to attend the festival and each Friday during July and August there will be two Canada-Anchor-Danish Line steamers sailing from Montreal for Great Britain and the Continent.

London now has 30,000 men on the police force.

Aviation in Alberta

Alberta Flyers Have An enviable Record Of Performance

Alberta flyers, fewer in number than those of the majority of the provinces in Canada, are among the most active, to judge from the latest figures from the Department of Civil Aviation, which show that during the year 1929, 14,920 flights, during which about 500,000 miles were covered, were undertaken. Alberta flyers during the year spent 6,415 hours in the air, the average flight lasting for 25 minutes. The planes carried 12,180 passengers.

Dyspepsia responds quickly to Douglas' Egyptian Liniment. Keep a bottle handy in the stable.

The Roman Colosseum seated more people than the Yale Bowl, the former accommodating 37,000 people.

Awarded Trophy

The French section of the International League of Aviators voted the 1929 trophy for outstanding aviatoric accomplishment to Dorothea Coats and Maurice Belloc, for their Paris-to-New York flight. A medal of honor was awarded Jean Mermoz, French pilot, who flew to Brazil.

Catarrh of Nose or Throat

Made more endurable, often benefited by inhaling vapors

VICKS VAPORUB
 From Dr. J. C. Vicks, New York

Was Weak and Run Down

Could Scarcely Do Housework

Mrs. Edward A. Allen, Sarnia, Ont., writes:—"I would like to tell you of the great benefit I have received from your Milburn's Heart and Nerve Pills. I was feeling very much run down in health, and was so weak I could scarcely do my housework. In fact, I would have to lie down in the afternoon for an hour or so. I saw your Pills in the drug store and took a box home with me, and I was delighted with my renewed strength. I have recommended them to a neighbor and feel sure they will help her too."

Price 50c a box

Sold by all drug and general stores, or mailed direct on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Keep Foods Deliciously Fresh

Keep your foods—cakes, bread, pies, cut meats, etc.—under a covering of Para-Sand Heavy Waxed Paper. You'll be amazed at the length of time they'll stay fresh. Delicious Para-Sand keeps them from staling. Get Para-Sand in the handy, sanitary knife-bladed cartons. For less exciting uses ask for Appleford's "Custard Pail" Packs in short form.

Use Of Fertilizers Throughout Western Canada Would Greatly Increase Production

That the use of phosphate fertilizers throughout Western Canada would increase the average yield and would lower the cost of production sufficiently to enable Canadian farmers to better compete with low grain prices on the world market, was the statement made at Moose Jaw by Dr. Ray Meising, of the Consolidated Mining Conference of the Western Canadian Agricultural Society, held in the Grand Hall Hotel.

Dr. Meising was explaining the results of experiments made throughout the prairie provinces during the past four years, to establish the feasibility of using phosphate fertilizers in increasing the grain yield and promoting early maturity and to illustrate his points, showed actual pictures of fields in the three provinces where the new fertilizer had been used successfully.

Thomas Sears, president of the local agricultural society, presided over the dinner meeting, which was largely attended, while a short address was also given by J. C. Mitchell, Dabbins, former world's "wheat king," who told briefly of personal experience with the new phosphate fertilizer, and his belief that it would be a practical boon to Western farmers.

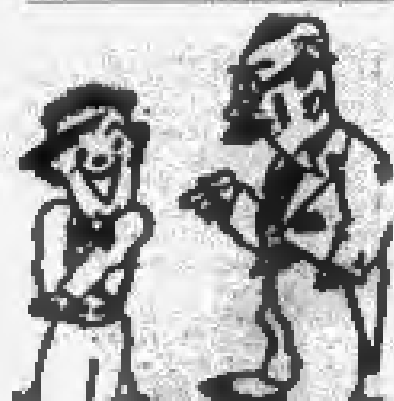

In his opening remarks, Dr. Meising stated that concentrated experimentation over a period of four years had proved conclusively that when the new fertilizer was drilled in with the grain at the time of seeding, it resulted in earlier maturity and more rapid growth of the plant, while the yield was increased appreciably. Over 400 Saskatchewan farmers had co-operated with the provincial department of agriculture in making trials with the new fertilizer, he stated further, and it was proved that to be effective with grain crops, must be drilled in with the seed.

Showing slides, the speaker pointed out that not only would the loss of crops be avoided but the quality of the grain would be retained. The fertilizer had been used with effect on hay lands and various green crops, while in Southern Alberta it had been used to advantage on sugar beet crops where it had increased the yield from five to seven tons per acre, and had slightly raised the sugar content, besides maturing the crop from five to seven days earlier than normally.

"So when we realize the inter-dependence of plant nutrition, soil and climatic relationships," he concluded, "We can better understand why the drilling in of small quantities of phosphate with our seed will bring about such remarkable increases in the yield of our crops and their earlier maturity."

A North-West Connection

Writing words may be met over a telephone line by use of an attachment devised by German telephone engineers, who are testing it. Should the German have difficulty in understanding a spoken word he asks the speaker to spell it, and it appears before the listener in writing. German long distance lines are expected to first use the attachment.

"You had better hurry, otherwise I am going to see your doctor, and an hour afterwards I am just in a state with a man, playing cards."

"That was my doctor,"—Shampoo, Shampoo.

Story Of Lost Mine

Reported Discovery Of Gold and Platinum in Alberta Foothills Has the Lost "Laramie mine" been rediscovered?

The reported discovery of gold and platinum in the Livingstone range in the Alberta foothills country just south of Turner Valley oil field, has renewed the hope of the legendary "lost mine."

Told by old-timers of the district, the story is that a mine by the name of Laramie discovered a rich white gold mine somewhere west of Nanaimo in 1876. He was asked, it was said, by friendly Indians.

Following the discovery Laramie returned to Idaho to bring his wife and family to Alberta, but on the return journey all met death, either by an Indian attack or drowning. White men could never locate the mine, and the Indians alone knew its secret.

Today with the report of a rich find the pioneers of the district recalled the early day legend.

More than 100 claims have been staked in the area, which is 100 miles northwest of Lethbridge.

After 15 years' search, two prospectors of Bantry, Alberta, made the discovery of the gold and platinum bearing veins, and more have gone into the Livingstone region.

(By Mrs. A. Tugsey.)

FOR Dainty Daughters

All Tugsey models are created and sketched in Paris and the patterns are made in New York.

Any little miss would love this wool challis frock. It is French blue overlaid in fine stripes, with plain matching shoes used for the price, panel front and the cuffs.

It is the latest thing to make. The tucks at either side of the front and the back are decorative.

To give easy movement, the dress widens into comfortable flared bottom toward the hem.

Other attractive combinations are orchid and white checked gingham with plain orchid, yellow plaid with white plaid and also green plaid with white plaid and in green.

This pattern may be obtained in size 2 to 6. It is ready for immediate delivery. It is hand cut.

Send 25 cents (in stamps or cash) to Fashion Bureau. Write carefully and plainly your name and full address, the number of the pattern and the size you want.

A New Food Product

Department Now Under Way To Manufacture Honey-Butter

One of the most interesting experiments in the field of agricultural products and laboratory science is a recent account of experimental work now under way with the object of combining honey and butter into a food product called honey-butter. This work is now engaging several workers in dairy and honey research and definite results have already been obtained in the direction of producing such a commodity.

The idea, which by the way is Canadian in its origin, is to bring to the market a product which will be used for sandwiches and picnic purposes with very definite possibilities of becoming a standard household article. The term honey-butter certainly has a hearty sound about it if this is to be any criterion.

An interesting speculation in connection with this piece of work is in connection with the age-old combination of milk and honey as a description of lands of unusual fertility and verdure. Milk and honey have become symbols of much that is good and their value as nutrients has never been questioned. The combining of honey with the most famous product of milk should certainly give rise to a product of unusual food qualities.

From the standpoint of the beekeeper as well as the dairyman, the establishment of such a commodity should also lead to an increased consumption and wider markets. Honey-producers have been endeavoring for many years to get a wider recognition and use of honey as a food and the turning of a considerable portion of the surplus into the manufacture of honey-butter would probably mean more to this industry than many years of publicity.

We shall be watching with interest for the appearance of this food on the market and let us hope that it proves as palatable as the ingredients would indicate.

When Four States Meet

Only One Spot Where Four Boundaries Touch in North America

At one place in the United States it is possible to stand with the feet of the right foot in one state, with the toe of the right foot in another, with the left foot in a third and the toe of the same foot in a fourth state. This unique spot is where the boundaries of Colorado, Utah, Arizona and New Mexico meet. It is the only place in the country where four states meet at the same point.

Coaches-Merchandise and bus lines meet here, and 1,342 hotels and 1,342 hotels.

Revolving Loan Plan To Aid Western Canada Farmers Is Outlined By C.P.R. President

How Egg Storage

Is To Be Replaced By Carbon Dioxide Gas In New System

The storage, a new development in keeping eggs fresh until the market is ready to absorb them, is interestingly described in the current issue of the News Letter of the Dominion Dairy and Cold Storage Branch at Ottawa. Briefly described, the eggs packed in 10-drum packages and placed in a metal container known as an Autoclave. When these are placed in the storage compartment the air within the Autoclave is pumped off and replaced by carbon dioxide gas. As a further precaution against the presence of oxygen in or near the eggs the air outside the container is also drawn off and replaced by CO₂. Theoretically, and it is proving true in practice, an egg stays fresh directly in proportion to the extent to which it contains CO₂, and the two bag-bears of cold storage, would growth and fungi, can develop only in the presence of oxygen with a humidity of 85 degrees at temperatures of 35 degrees Fahrenheit or over. Owing to the absence of oxygen no mould growth takes place and the egg comes out of storage in a most attractive condition.

Demand For Wheat

Domestic Market Is Increasing According To Latest Figures

In 1927, Canada's consumption of wheat and wheat flour was 5.50 pounds per capita per annum, and by 1928, this had increased to 7.10 pounds. This increase of one per cent, roughly, is seemingly small, but, as pointed out in a circular letter of the Canadian Co-operative Wheat Growers, Limited, it is really impressive. "With our present population of about ten million people the one per cent increase represents 10,000,000 pounds or about 200,000 bushels or eight per cent of our total wheat production."

Great Banking In B.C.

Interest in great banking continues at a high point in British Columbia. During last year five banks were chartered in the record of performance for far goals, but had been qualified. The highest test was made by a Pacific bank, "Pacific Bank"—200—owned by Harold G. Brown, of New Westminster, whose bank yield was 1.25 per cent and better for 1.25 per cent.

DANCE WITH PRINCE OF WALES

Miss Daisy Gordon, of Montreal, Ont., daughter of Mr. and Mrs. J. C. Gordon, who was the Prince of Wales' partner for four dances during his recent visit to Kingston, Ontario, on his trip south to the Atlantic. Miss Gordon's father is a director of the hotel at Kingston.

Proposed in connection with the organization and operation of the Dominion government's \$5,000,000 revolving loan fund to aid Western Canada farmers were outlined by E. W. Beatty, K.C., president of the Canadian Pacific Railways. Mr. Beatty was first president of the plan, definitely announced by Premier R. B. Bennett at Regina, December 24.

The railway had offered two major suggestions for officials named to handle the fund, which has been placed in the hands of the newly-chartered Dominion Agricultural Credit Corporation. No burden of handling charges should be imposed on the farmer, he thought, and the safety of the investment must be insured.

"The policy must be operated in such a way," he said, "as not to impose a burden on the farmer in the matter of handling charges, interest, etc., but rather to provide him with a greater stability in raising power at the very minimum of cost. It must also insure the safety of the investment so that the capital of the loan corporation is not impaired."

He reiterated his belief, first declared at London, Ont., last December, that the plan would "improve conditions under which farm operations are carried on in those districts where the credit can be properly used."

In some particulars, Mr. Beatty thought, the credit body should function similarly to administrators of the "Minnesota plan." He thought it "might be advisable" to adopt the United States minimum and maximum loan clause. This would set loans at \$100 to \$1,000. "However," he added, "I would not favor the granting of the maximum amount except under special circumstances."

Length of time for which the loans are made also might be adopted from the "Minnesota plan," the C.P.R. president said. Under this three-year plan, the farmer would pay back 50 per cent of his loan after the first year, 25 per cent after the second and the balance after the third year.

Mr. Beatty asserted the loan plan here would be operated under vastly different conditions than when it met with "amazing success" in Minnesota. "It will be well to remember," he said, "that their record in the matter of repayment of loans has been delivered in the period when prices and other conditions were comparatively good, that they have a great advantage over this country in the matter of population and, therefore, of consumers, and that greater difficulty may be experienced under more adverse conditions."

"This," he added, "suggests the advisability of some conservation in the extension of credit at the outset at least." Greater safety in the operation of the loan scheme would be achieved through numerous relatively small loans and, though he said it was not yet possible to estimate cost of managing the credit corporation, "It should be urged that all possible attention be explored with a view to establishing credit facilities at a rate of interest not to exceed six per cent," said the C.P.R. president. He stressed that the plan is not expected to "work miracles" for the farmer.

"The central idea of the plan should be to seek to develop in favorable conditions of the home of some diversity in livestock, which under different conditions might include two to five years, one or two years, 25 to 50 bushels and, wherever possible, 25 to 50 bushels per individual farm."

Widely For Wheat

"There may be many opinions as to Johnston's plan to make," writes a correspondent of The Cape Argus, of Cape Town, "but there can be no doubt of its intent for it. One can well see and to aid of the shipping yards of the city without ever being out of contact of one in-stream or another. As often as not you will hear them struggling one against the other in a deal of mud."

WORLD HAPPENINGS
BRIEFLY TOLD

Mrs. George Dewey, widow of the hero of Manila Bay, died at her residence in Washington.

The British Columbia Government reverses federal rather than provincial control of radio in Canada, in its reply to a query from Ottawa.

Mr. Robert Burnett, 78, who was physician to the Marquis of Lorne, when he was Canada's governor-general, is dead.

Appointment of John A. Wilson as chief executive officer of the Boy Scouts Association in Canada, has been announced by the executive committee of that body.

The 19th amendment has been maintained as valid by the Supreme Court. Under the decision the government will continue its efforts to enforce the Volstead law.

Walter Lindrum, the famous Australian billiard player, was summoned to Buckingham Palace to give a demonstration of his skill before the King and Queen.

The conferment by the King of an honour upon Viscount Willingdon, former governor-general of Canada and viceroy-elect of India, is announced in the Official Gazette.

Mr. Alexander Gibb, noted British port authority, has been invited to investigate the technical and business features of the ports of Halifax, St. John, Quebec, Montreal and Vancouver.

"Big Bill" Thompson, invincible as ever, won his fourth mayoral nomination in the Republic primary election in Chicago, defeating by a plurality estimated at 45,000 Judge Joe H. Lyle.

MacMillan's Equipment
Will Include 'Flares'

Arctic Explorer Outfitted Plans For Trip Into Baffin Land

Donald B. MacMillan, Arctic explorer, outlined plans for an expedition into Baffin Land and the North Polar region next summer. The expedition, he said, would be in three sections—the first sailing from Worcester, Maine, June 20, to be followed by Dr. Alexander Parham, of Boston, and Sir Wilfred Grenfell, of London. Three aeroplanes will be included in the equipment.

One of the principal objectives, he said, would be the study of glaciers to determine the possibility of the formation of another "glacier age."

Perdax Balm promotes cleanliness, charm and beauty. It is unrivalled in its magical effect on the skin. Swiftly absorbed by the tissues, it leaves never a vestige of stickiness. Delightfully cool to the skin, stimulating and invigorating. Softens and makes the hands flawlessly white. Subtly fragrant, imparts youth and loveliness to the complexion. Perdax Balm is the inevitable choice of the woman who cares.

Discover New Land

New land has been discovered in the Antarctic by the Norwegian whaler, Torlyn, the whaler reported in a wireless message. The new land, the message said, is a continuation of Mt. Robertson Land, which Sir Douglas Mawson discovered last year.

Wrenched From Asthma. Strength of body and vigor of mind are inevitably impaired by the visitations of asthma. Who can live under the cloud of recurring attacks and keep body and mind at their full efficiency? Dr. J. D. Kellogg's Asthma Remedy dispels the cloud by removing the cause. It does relieve. It does restore the sufferer to normal bodily trim and mental happiness.

GILLETT'S

cleans the bathroom
in half the usual time

Full strength for toilet bowls

Full strength for the toilet bowl

In solution for general cleaning

GILLETT'S Lye "Eats Dirt"

Flake Lye

* Lye should never be
dissolved in hot water.

ONE tablespoonful of Gillett's Lye dissolved in a gallon of cold water provides an ideal, safe solution that quickly cleans everything in the bathroom.

Use it to wash walls, the floor, in the sink and bathtub . . . and remember, when you use Gillett's Lye, each is disinfected as well as cleaned with the one operation.

Once each week, pour full strength Gillett's Lye down the closet bowl and it will always be clean and free-running.

Gillett's Lye has dozens of other handy household uses. Send for the new FREE Gillett's Lye booklet describing the many ways it will help you with all your cleaning.

British Air Ministry

Has Difficult Task

Every Day Amount Of Sunlight Penetrating City Is Measured

One of the most difficult tasks in London is carried out daily at the Air Ministry offices, where the amount of sunshine penetrating the city is measured. The measuring apparatus consists of a small glass ball through which the heat of the sun passes to burn a special paper placed beneath it, the mark on the paper being used to compute the amount of sunlight passing through.

She Couldn't
Be Hoodwinked.

Miss E. Thompson, of Clapham, writes:—"I find that Carter's Little Liver Pills will do more to keep the complexion clear, and the skin free from blemishes, than all the face creams I have used. I found the real cause of face blemishes was usually due to liver and stomach troubles. My druggist recommended them as a specific for stimulating the liver and expelling the constipation poisons from the system." Take Carter's Little Liver Pills for sick headache and indigestion. All druggists 25c and 75c the red pill.

Work For Russian Women

British Government May Employ Women To Overcome Labor Shortage

Employment of hundreds of thousands of women in industries to overcome the present serious shortage of labor, is being considered by the government of the Soviet Union.

With thousands of jobs for which there are no takers, the country today has the greatest shortage of labor in its history. With millions of women inactive it is believed the problem could be solved by pressing them into service. The children would be cared for by the state while their mothers are working.

Four Has Failed It.—Dr. Thomas' Electric Oil has been on the market upwards of fifty years and in that time it has proved a blessing to thousands. It is in high favor throughout Canada and its excellence has carried its fame beyond the seas. If it were double the price it would be a cheap liniment.

A Worth While Achievement

American tourists returning from Europe report that beauty is coming back into style. It is doubtful if they will ever again obtain great popularity in America. But if some superstitious would advise a way to transmute the over abundant facial hairs of the male to the uppermost portion of his cranium—ah, there would be an achievement.

Government and private shut works in Japan may be stopped.

Tom Was Convincing

New Post-Post 'Plane Will Land Most Safely

A full-sized aeroplane which its inventor claims will neither stall, spin or dive and will land itself, is the latest contribution to safety in the air.

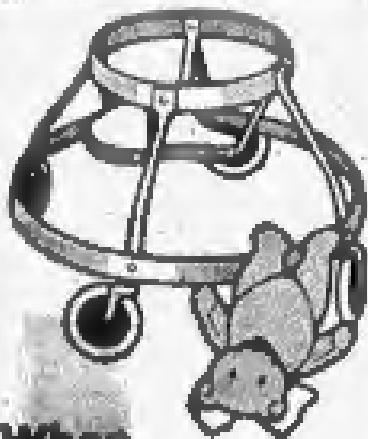

While more than an hundred aeromachanical experts and engineers watched the 'plane was successfully landed at Glenn H. Curtiss airport, New York. Piloted by Henry White, it made a half dozen short flights, and came to a near-perfect landing each time with the pilot's hands high above his head.

The designer is A. A. Merrill, of White Plains, N.Y., formerly in charge of aeromachanical research at the California Institute of Technology, and a contemporary of the Wright Brothers, Octave Chanute and Langley. He has been working on the 'plane since 1913, and at one time was forced to mortgage his life insurance to continue.

Movable wings which can be adjusted over an arc of 14 degrees are the secret of the 'plane's stability. In flight these restricted flying surfaces prevent a pilot from unwittingly going into a stall or a dive. In landing, they mechanically level off at the proper distance from the ground and assume the proper gliding angle.

Alberta-B.C. Boundary

Legislation has been brought down in the British Columbia legislature by Hon. N. E. Loughheed, Minister of Lands, approving the Alberta-British Columbia boundary as surveyed by a joint commission between 1913 and 1924.

When
BABIES
are Upset

BABYs and ailments soon take on a sinister air. A sudden cry may mean colic. Or a sudden attack of diarrhea. How would you meet this emergency—tonight? Have you a bottle of Castoria ready?

For the protection of your own eyes—for your own peace of mind—keep this old, reliable preparation always on hand. But don't keep it just for emergencies; let it be an everyday aid. Its gentle influence will soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. All druggists have Castoria.

Fletcher's
CASTORIA

SUNDAY SCHOOL LESSON

MARCH 2

THE GOOD SAMARITAN

Golden Text: "Thou shalt love thy neighbor as thyself."—Leviticus 19: 18.

Lesson: Luke 10: 25-37.
Devotional Reading: Matthew 23: 34-44.

Explanations and Comments

The Law Of Love To God and Man, verses 25-28.—One time a scribe, an expert student and expounder, of Hebrew law, sought to test Jesus by asking him a hard question. "What shall I do to inherit eternal life?" he queried, and by this he meant: What acts, such as fasts and prayers and sacrifices, would have special merit and would therefore be rewarded by life eternal? "What is written in the law? How readest thou?" thus Jesus bade him answer his own question. The scribe then quoted Deuteronomy 6: 5 and Leviticus 19: 18: "Thou shalt love the Lord thy God with all thy heart, and with all thy soul, and with all thy strength, and with all thy mind (i.e., with all thy powers); and thy neighbor as thyself. That Jesus united the two, love for God and love for one's neighbor, is not surprising, but that the Scribe does so, causes one to surmise that it was brought about by some remark of Jesus which is not recorded. "Thou hast answered right; this do, and thou shalt live," said Jesus.

"Oh, read not them the lesson thou hast taught?" When life's all love, 'tis life; might else, 'tis naught."—Lester.

What it means to love man, the parable that follows explains, but what does it mean to love God? Dr. Frederick W. Robertson says that it can mean only one thing: God is Character, and to love God is to love character. For instance, God is Purity, and to be pure is to love God; God is Love, and to love men is to love God; God is Truth, and to live a brave, true, real life, that is to love God. So Whittier, in one of his letters wrote: "I have no consciousness of loving God as a Person, or Power, apart from His attributes. I have no experience or ecstatic emotions, but I know that I love goodness and mercy, charity and peace; that my soul longs for harmony and moral symmetry; that I would sooner wrong myself than my neighbor; and, at times, the sweet sense of an Infinite love overwhelms me and fills me with gratitude and thanksgiving."

When a mother detects from the writhings and fretting of a child that worms are troubling it, she can procure a reliable remedy in Miller's Worm Powders which will expel all worms from the system. They may cause vomiting, but this need cause no anxiety, because it is but a manifestation of their thorough work. No worms can long exist where these Powders are used.

Japs Angry At Soviets

Feeling against Soviet Russia is rising rapidly in Japan at the report that the Soviet Union has threatened to cancel the Japanese fishery concessions in Siberian waters because of a default by Japan in payment of royalties which were over due.

Nearly all children are subject to worms, and many are born with them. Spare them suffering by using Mother's Worm Expeller, an efficient remedy.

Young Wife: "I haven't to speak with my husband was abroad."
Mother: "Well, and what did he say when he returned?"
Young Wife: "He went abroad again."

Daughter Is
Stronger Now

"My daughter Catherine is eleven years old. She was very irregular, often sick at her stomach, and had to stay in bed two or three days at a time. One of your booklets was sent to us by mail so I got her a bottle of Vegetable Compound. Catherine has been taking it regularly and she is gaining in weight and every way. I told the neighbors and four other girls and taking it with good results."—Mrs. Clarence Jackson, Box 14, Thomlin, Ontario.

Lydia E. Pinkham's
Vegetable Compound

SEA HARBOR FOR PRAIRIES TO OPEN SOON

Winnipeg, Man.—In a few weeks workmen will lay again at Churchill. They will start the last six-month lap on a job that is to give the northern harbor a 2,500,000-bushel grain elevator with the second largest warehouse in the world.

Storage will mean but little to the sprawling line ranged along the south shore of the rock-enclosed harbor at the end of the Hudson Bay Railway. But ability to handle grain—to dump cars, to clean, weigh and separate the grain, to run it out to waiting ships—will be a paramount necessity for the elevator at the port with a winter-shortened season.

More than 500,000 bushels daily may pour through the varied processes of the Churchill elevator's warehouse when work is completed in the middle of next September. Only the great Pool Elevator Number Seven, at Port Arthur, will be able to handle grain more rapidly than the terminal "north of 55." If the Churchill plant is ever pressed to capacity the route will be a success.

About 750,000 bushels of wheat will be rushed overseas this fall between the time the elevator is ready September 15 and the close of navigation on the Bay, according to the promise of Dominion authorities. Some organizations in the west are pressing for a shipment of as much as 5,000,000 bushels this fall, but it is understood from reliable sources that such a flow of grain in the brief available time would tie up dock work in progress and threaten the efficiency of elevator and dock facilities.

At the present moment, ground-work on the elevator is completed to the first floor. In late March it is expected construction of the power house will commence alongside the elevator. In May, concrete pouring begins on the elevator and the warehouse, from the ground floor upward. Work on shipping galleries, too, must be hurried in order to have them ready for the restricted shipping of this fall.

Across the harbor from the historic Fort Prince of Wales, the new elevator will reach out 500 feet along the shore line and tower 300 feet against the north's gray sky. Close by are the terminal yards of the Hudson Bay road, which rolls northward over 800 miles of sun-baked country from The Pas, itself on Manitoba's frontier.

All Canada will be watching when the mechanism of Churchill's port moves into real action this fall—more than 300 years after the Duke, Jens Munk, first eased his boat into the mouth of the Churchill River to spend the tragic winter that cost the lives of all but three of his 64-man expedition. This fall comes the test of Canada's greatest experiment for many a year—the building of a sea harbor for the prairies.

Seeking Pensions For Blind

Manitoba Asking Federal Government To Finance Scheme

Winnipeg, Man.—Dominion parliament is called upon to implement a pension scheme for blind persons in a resolution adopted in the Manitoba Legislature.

The resolution was sponsored by William Evans, labor member for Winnipeg. The pension for the blind would be financed in whole or in part by the federal government.

Well Supplies Boiling Water

Vinc, Alberta.—Lee Chapel, farmer of this district, is taking things easy these days. Not for him is the worry of boiling water with which to brew his favorite cup of tea, for shaving water or the long-deferred ablution. He recently tapped a well that supplies him with ready boiled water all the time. Mr. Chapel has sent two bottles of the water to the University of Alberta for analysis.

Women Masters Staging Race For Championship

One Of Features Attraction At The Pas Dog Derby

Winnipeg, Man.—A deal over the snow-swept trails of Northern Manitoba to settle the title of woman dog mauling champion of the world, with a side bet of \$1,000, promises to be one of the feature attractions of dog derby week at The Pas as a result of developments, announced by A. E. Warren, vice-president Canadian National Railways, patron of the northern classic. Early this winter Miss Thelma Gordon, girl number from McColl, Idaho, recognized as the leading musher in the western states, challenged Mrs. E. P. Ricker, of Poland Springs, Maine, to a 20-mile dog race for the mauling championship of the fair sex. She asked for a side bet of \$1,000 to be posted before the race. The contest would take place over a course here selected by the dog derby committee.

The dog derby committee of The Pas has received a wire from Mrs. Ricker accepting the challenge. Both women are expected to take part in the 200-mile dog race from The Pas to Flin Flon and return starting March 30. Miss Ida Carriere, another woman entry, is also training over northern trails for the long race.

Three of the northland's most fearless mushers, St. Godard, Earl Brydges and "Shorty" Russick, left Winnipeg via Canadian National Railways for The Pas, Man., where they will whip their dogs into shape for the grueling 200-mile race.

Important Ruling By Alberta Supreme Court

Collection Of Fees Under Dominion Charter Is Illegal

Calgary, Alberta.—Fees assessed by the Lieutenant-Governor-in-Council on companies with a Dominion charter cannot be collected, according to judgment of the appellate division of the Supreme Court of Alberta.

The question arose in an action taken by the attorney-general of Alberta against the Royal Oil Company for collection of a fee imposed by the provincial government through the Lieutenant-Governor-in-Council and under the Alberta Companies Act.

Unemployed Make Trouble

Got and Two Policemen Injured In Toronto

Toronto, Ont.—Two policemen, a ten-year-old girl and a woman were injured when at least 2,000 of Toronto's unemployed gathered at the corner of Spadina Avenue and Dundas Street, in the downtown section, where a proposed unemployment demonstration was to be held.

Seven demonstrators were arrested when stones, bricks, and other missiles were directed at the police, who retaliated by a charge along the thoroughfare.

Win Cavalry Cup

Manitoba Mounted Rifles, Portage in Prairie, Awarded Honor

Ottawa, Ont.—Manitoba Mounted Rifles, Portage in Prairie, won the Canadian Cavalry Association's silver-sash challenge cup with a score of 5,324 points out of a possible 5,743. It was announced here recently. Eighth Princess Louise Hussars, New Brunswick, came second with 4,268 points.

Oxford Rifles, Woodstock, Ontario, won the Infantry "Signallers" competition with 5,666 points.

May Amend Mining Act

Quebec Introductory Bill To Bar Speculators In Toronto

Toronto, Ont.—Speculators who rush into mining areas and avail themselves of the privilege of staking claims which they hope to develop into lode mines, but who are later frustrated by the provisions of the bill to amend the Mining Act, introduced into the Ontario legislature by Hon. Charles McCrea. All claims must be developed to mine and not as real estate speculation under the amended mining plan.

NOTABLE SEAFARER

Sir James Worthington Evans, 62, secretary of war in the last Conservative government of Great Britain, who died February 12, had a distinguished political career and was one of the mainstays in the high councils of the Conservative party. As a great lawyer he will be remembered by Canadians principally as the London solicitor appointed by the British government to realize assets of the British America Company, the London Globe, and other Whitaker Wright concerns after the great financial smash in 1901.

Sign Wheat Agreement

Western European Nations Sign An Agreement On Wheat Stocks

Paris, France.—At the French foreign office, 14 European nations signed the final act for the disposal of the wheat stocks of the central and European states. Russia was not invited to the conference. Russian wheat, therefore, was not included.

The signatory states are Germany, Austria, Bulgaria, Estonia, Finland, France, Greece, Hungary, Italy, Latvia, Poland, Lithuania, Rumania, Switzerland, Czechoslovakia, and Yugoslavia. Seven persons did not sign. They are Britain, the Irish Free State, Belgium, Denmark, Spain, the Netherlands, and Sweden.

Report Is Denied

Ottawa, Ont.—"No hard discount from last prices has so far been placed for duty purposes on books imported into Canada from the United States for sale." This was the statement made at the Department of National Revenue in referring to a report that a hard discount of 40 per cent. was to be applied generally on books imported from the United States, effective April 1.

Northern Trade Route

Investment Made In The Lower Than Expected Cost Of Hudson Bay

Ottawa, Ont.—Within the past three weeks there has been a sudden and in many ways completely unexpected interest in the part of Canada, British and foreign shipping companies in the Hudson Bay route.

Hon. Dr. R. J. Maclean, Minister of Railways and Canals, declined to discuss these recent developments. He will make a detailed statement in parliament, by which time it seems certain that definite plans and commitments will have been reached which will assure Fort Churchill a striking opening, and assure the future success of the new trade route.

It is learned authoritatively that several large steamship companies have come forward and declared their intention of placing ships on the new route. This applies to British and foreign shipping. There has been a most remarkable reaction among Canadian ship operators, who see tremendous possibilities in the development of inter-provincial trade. Maritime provinces companies are going to try to develop trade direct with the prairie provinces. British Columbia companies already have completed plans for a trade in lumber, with cargoes of wheat outgoing from Churchill to foreign ports, and a return cargo from foreign ports to Vancouver.

These shipping interests have taken a firm hand in matters of insurance and cargo rates. Lloyd's, of London, England, have been stirred up and it may be announced definitely that the insurance rates out of Churchill will be much lower than hitherto has been expected.

To Oblige the Prince

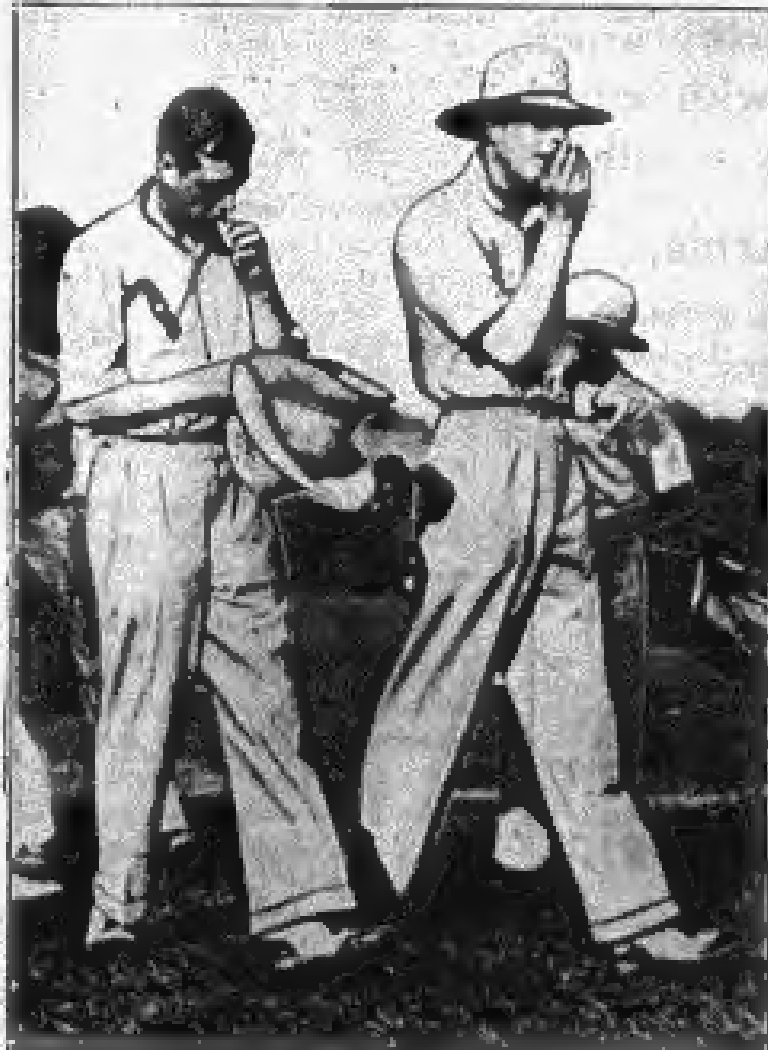

Revert In Peru Is Held Off Until Departure Of His Royal Highness

Vina Del Mar, Chile.—Reliable persons reaching here from Peru declared that the revolt in that country was ready to start at the time the Prince of Wales visited Peru only a few days ago, but was held off until the British party had safely left.

The persons who gave the information followed the Prince of Wales party through Peru and Bolivia. They said that while the Prince of Wales was in Peru a number of officers, who said a revolution was impending, went to the Prince and told him that they would hold it off until he had completed his visit.

Air passages and mail routes in Europe now cover 72,000 miles.

ROYAL BROTHERS AT GOLF

The Prince of Wales and his brother, Prince George, are here seen on the golf links at Panama, C.R., during a round when they made a short stay at the Canal Zone city on their way north to the Argentine expedition. Note the Prince of Wales' double-decker hat which he wore as guard against the sun.

RUSSIA WOULD TRADE COAL FOR FARM MACHINERY

Montreal.—If Canada will accept \$5,000,000 worth of Russian coal to pay for payment, Russia is willing to purchase her agricultural machinery. The total value of which will amount to \$10,000,000, according to a plan which, Lieut.-Colonel Richard J. Mackie, former Conservative member of parliament, stated he had laid before the government at Ottawa, on behalf of the Soviet Government. The balance of the debt would be settled in gold, and the Soviet Government is understood to have expressed its willingness to hold a conference with Canada at which a plan would be formulated for marketing of wheat without dumping.

In the opinion of Col. Mackie some understanding with Russia about the marketing of wheat is expedient. Anticipating the success of the five-year plan and racing in eye on Russia's success in wheat growing up to this time, he seemed impressed with the strength of her position. He feared that unless some agreement were reached with Russia she would undersell Canadians in every market of the world.

As for the opposition against importing Russian coal, Col. Mackie believed that the strongest propaganda had been mounting from American competitors of the Soviet. Russia's purpose is to export machinery, in domestic steel, a product which could not possibly compete with coal from Nova Scotia. The Russian coal would be in direct competition with the imported American product, Col. Mackie said.

"Canada and Russia must get together on wheat—we must have a conference," said Lt.-Col. Mackie.

"As things are, we had fair to provide Russia. At a conference in London, England, with a Canadian trade representative, Saul Bron, the chief Soviet trade delegate to the British Empire, reiterated this plan, and this morning: 'Do not put Russia on the defensive.' He said it again and again, constantly, pleadingly."

"I know the seriousness of Bron's statement, possibly better than any other Canadian, for I have made 17 visits to Russia since the revolution, and I know Russia's power to help or hurt my country," to wage economic war or peace.

"High Russian officials have approached Canada through me, asking for a conference. The idea receives the support of the Argentine and Australian government representatives in London, England. Only a few days ago Chairman Legge, of the U.S. Farm Board, said that he could see value, with nothing to lose, in such a conference with Russia."

Well-Known Geologist Dead

Dr. Robert Stewart, Of Toronto, Had Mining Career

Toronto, Ont.—Dr. Robert Stewart, well-known geologist and medical practitioner, and an authority on mining in the Hudson Bay district, died here last week.

While associated with the Hudson Bay Company and the Ontario Bureau of Mines, Dr. Stewart had a stirring career, being twice shipwrecked on Hudson Bay boats, once in the Bay of Ungava, in 1905, and once off the coast of Labrador, in 1907. His last trip to the North was made in 1908. Dr. Stewart was born in Inverness, Ontario.

Increase In Autos

Ottawa, Ont.—Canada had a motor vehicle for every eight persons in 1928, as compared with one motor vehicle for every 11 people in 1926, according to a report issued by the Dominion Bureau of Statistics recently. The number of motor cars registered in 1928 was 1,220,000, an increase of 44,300 over the previous year.

An electric light that can be turned on or off by a puff of one's breath was recently exhibited in New York.

Inga Election Results

The municipal elections of Inga this year did not create the excitement usual with their elections. The usual close returns of the Councillor in Div. 4 narrowed the fight down to those in Divs. 6 and 7. While the result in the latter division was a foregone conclusion, this did not deter the sitting Councillor's opponents from using a lot of energy in their effort to defeat him.

Final results in Div. 1 was McKinlay 132, Propp 128.

In Div. 6 the result could not be so easily foretold, as the sitting Councillor is said to have had a lot of former residents in his district up in arms against him. This opposition was counter balanced by the loyal support of the ratepayers at the Edmonton Beach summer resort. So Herr Reinhold went back to the Council board with a vote of 170. His opponent, Peter Kolak scored 132.

There will be no change in the personnel of the Council when it meets next week for the inaugural.

Card of Thanks

Councillor E. Geers wishes to thank in a very hearty manner the ratepayers in Div. 6, Inga M. D., for the splendid support given him at the election on Sat., Feb. 21.

Bright Bank Brink

One of the biggest whist drives ever pulled off west of Edmonton took place at Bright Bank schoolhouse on Friday last, with standing room only. After playing 20 games, prizes were distributed as follows:

Ladies 1st, Mrs. Moldenhauer; silverware valued at \$22.
Ladies 2d, Mrs. J. Kolak; set glassware valued at \$16.
Ladies Communion, Miss Nora McDonald.
Men's 1st, R. Washburn, \$27 Walker watch.
Men's 2d, O. Dickie, \$12 shotgun.
J. W. Brown was the men's consolation.

New Open Season for Muskrat

A communication received from Benj. Lawton, the Game Commissioner, says that owing to the extremely mild winter and the prospect of a very early Spring, the Lieut. Gov. in Council has seen fit to declare an open season on muskrats to the north of the North Saskatchewan river from Feb. 15, 1931, to April 15, 1931. Resident trappers in this and nearby districts will govern themselves accordingly.

Baseball

All interested in forming an Intermediate Baseball League are invited to attend the meeting to be held here Thurs. March 12th. Any teams that wish to be a member of the proposed league should have representatives at this meeting. Invitations have already been sent out to a number of teams in the district.

Basket Ball

The president of Stony Plain, Basket Ball League, Phil Anderson, announced a general meeting for Friday March 13, in Inga, Texas that place in the League in 1930 and those that wish to join this year are asked to be at the meeting on the evening of Friday, discussing up a schedule, rules etc., will be discussed.

Malvern Calls To Drama-Lovers

A forth the name of the Armada over the entire West Country, as from the little English town.

George Bernard Shaw

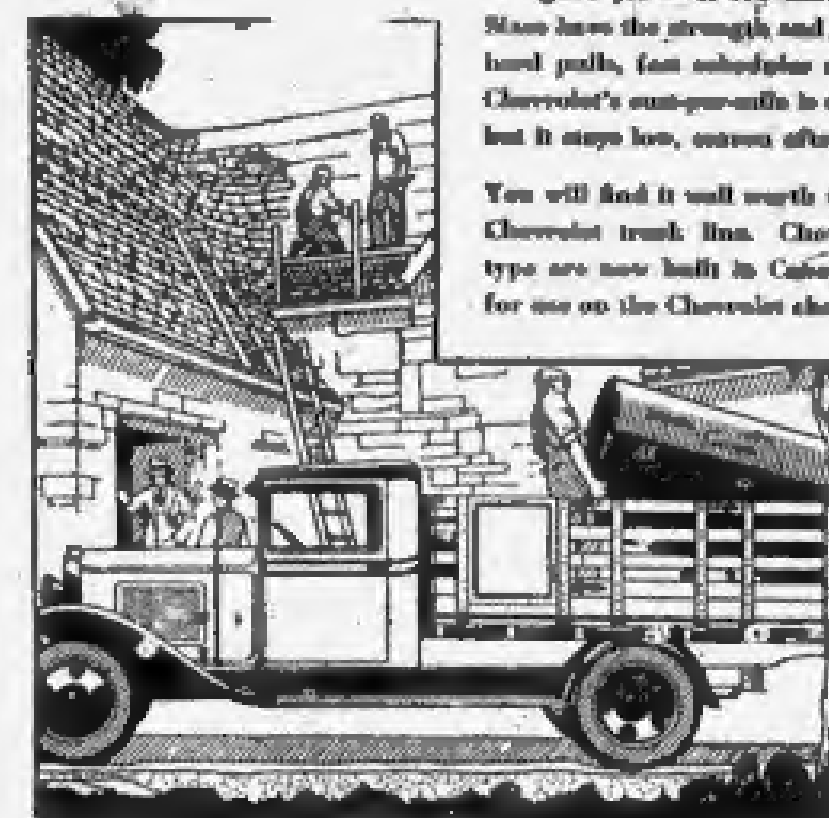

nestling among the Worcester-shire hills, hard against the Welsh border, used to go forth to-day of the happy life of the English drama, faithfully from year to year, by means of the town's Annual Festival. Under the direction of Sir Barry Jackson, this event has become a national institution, even as its companion festival at

Shakespeare's immortal Bardoloven-Avon. This year's program includes known and unknown English productions dating from 1513 to 1931 and is dedicated to George Bernard Shaw, to whom Sir Barry is looking to produce a new play, as the principal item of the bill, as he did "The Apple Cart" at the original Malvern Festival. The festival runs from August 3 to 23, inclusive, consisting of three repeated weeks of plays and a series of lectures by well-known authorities. Malvern is only 138 miles from London, but Gloucester and Worcester, both cities of considerable size and offering first-class hotels, are within easy reach. The town itself is also making special arrangements for the comfort of visitors during festival time. In addition to the whole section of England is dotted with villages and small towns with

good accommodations for the visitors, and is criss-crossed with railways and excellent automobile roads, in necessity of unsurpassed splendor.

Ballings of the Canadian Pacific's "Empress" and "Duchess", from Quebec to Southampton and Montreal to Liverpool, respectively, make excellent connections with the various weeks of the festival at Malvern, and will include the palatial new "Empress of Britain", the biggest and fastest ship in service between British Empire ports.
